Jagged Peak attributes its 1633% Revenue to Increased Demand for On Demand!

Tampa, Fl. Oct. 29, 2004 — Jagged Peak today announced that it ranked Number 142 on the 2004 Deloitte Technology Fast 500, a ranking of the 500 fastest growing technology companies in North America. Rankings are based on percentage revenue growth over five years, from 1999–2003. Jagged Peak grew 1633 percent during this period.

Jagged Peak's CEO Paul Demirdjian credits a cutting edge product, a dedicated team, and forward-thinking clients with the company's continued impressive growth. Our web-enabled system, EDGE, provides real-time management over the client's on-demand enterprise. We're fortunate at Jagged Peak to have a dedicated team of professionals who share our vision and we continue to bring on international clients that entrust us with their expanding global enterprise commerce needs."

"Making the Deloitte Technology Fast 500 is a testament to a company's commitment to technology," said Mark A. "With its 1633% growth rate over five years, Jagged Peak has proven that its leadership has the vision and determination to grow in difficult conditions."

Jagged Peak did not participate in the 2003 Deloitte Technology Fast 500. Jagged Peak previously ranked 229th in 2002 and 164th in the 2001 Deloitte Technology Fast 500's.

#### Fast 500 Selection and Qualifications

The Fast 500 list is compiled from Deloitte's 19 regional North American Fast 50 programs, nominations submitted directly to the Fast 500, and public company database research. To qualify for the Fast 500, entrants must have had 1999 operating revenues of at least \$50,000 USD and \$75,000 CD for the United States and Canada, respectively; and 2003 operating revenues must be at least \$1 million USD or CD.

Entrants must also be public or private companies headquartered in North America and must be a "technology company," defined as a company that owns proprietary technology that contributes to a significant portion of the company's operating revenues; or devotes a significant proportion of revenues

to the research and development of technology. Using other companies' technology in a unique way does not qualify.
